SUMMARY

MPH Epidemiology candidate with over seven years of experience across biomedical research, healthcare operations, and applied public health projects. Skilled in data review, quality control, documentation, and scientific writing. Experienced in translating complex health information into clear, concise summaries for diverse audiences.

SKILLS

Public Health & Research: Epidemiologic methods, public health data analysis, health disparities, occupational health interest, literature review, scientific communication

Data & Analysis: Data cleaning, data quality review, data validation, descriptive statistics, regression analysis, documentation, data management

Tools & Platforms: Excel, Microsoft 365, Microsoft Teams, SharePoint, R, Stata

Communication: Concise narrative writing, technical documentation, cross-functional collaboration

Languages: English (Fluent), Vietnamese (Fluent), Spanish (Intermediate)

EDUCATION

Master of Public Health (MPH), Epidemiology, Data Science Certificate – Expected Dec 2026

University of Texas Health Science Center | Houston, TX

Master of Science (MS), Biology – Translational & Clinical Research | Jan 2021 – Dec 2022

George Mason University | Manassas, VA

Bachelor of Science (BS), Chemistry, Minor: Biology | Aug 2016 – May 2019

Shenandoah University | Winchester, VA

RESEARCH & APPLIED ANALYTICS EXPERIENCE

Public Health Data & Informatics Intern

Connected Care Exchange / Rio Grande Valley Health Information Exchange | May 2026 – present

- Support public health and healthcare data projects involving hospital onboarding, clinical data organization, and dashboard development for a regional health information exchange.
- Assist with identifying, organizing, and validating inbound healthcare data elements, including demographics, admission information, physician data, and clinical records.
- Contribute to SQL-based data extraction and Tableau dashboard planning for a CDC-funded pediatric chronic disease project focused on diabetes and asthma.
- Translate project needs into clear data definitions, documentation, and analytic requirements to support reporting and program planning.

Public Health Data Analyst Intern

UTHealth Houston School of Public Health | Houston, TX (remote) | June 2025 – Sept 2025

GET PHIT Consortium; Internship Site: University of Texas MD Anderson Cancer Center

- Conducted a scoping literature review to identify barriers and facilitators influencing cervical cancer screening in clinical settings.
- Developed semi-structured interview guides and conducted qualitative interviews with clinicians across multiple healthcare institutions.
- Organized and synthesized qualitative findings into structured reports and presentations for program planning and research development.
- Translated findings into actionable recommendations for public health informatics and health equity initiatives.

Research Technician II/III

HHMI Janelia Research Campus | Ashburn, VA | Apr 2022 – May 2026

- Reviewed, organized, and documented research production data to support accurate tracking, quality control, and downstream reporting across viral vector workflows.
- Applied detailed SOPs and quality standards to complex laboratory processes, maintaining consistency, accuracy, and traceability across multiple concurrent workstreams.
- Investigated and documented process issues, including contamination events and batch-level discrepancies, to support corrective actions and workflow improvements.
- Managed competing deadlines in a fast-paced research environment while maintaining careful attention to detail and documentation accuracy.

Applied Statistical Analysis Projects (MPH)

UTHealth Houston School of Public Health | Jan 2024 - Present

- Cleaned and analyzed large secondary public health datasets, including NHANES, using Stata and R.
- Conducted multivariable regression and statistical testing to evaluate population-level health outcomes.
- Generated tables, figures, and statistical summaries to support evidence-based interpretation.
- Interpreted findings within public health and health systems contexts to inform recommendations.

Graduate Student Researcher (MS Biology)

George Mason University | Apr 2021 – Sept 2022

- Conducted graduate research on host defense mechanisms in pulmonary disease models.
- Completed an independent literature review on pharmacogenomics in oncology and presented findings in written, poster, and oral formats.
- Collaborated with faculty and peers to refine research outputs through iterative feedback and review.

CLINICAL, LABORATORY & HEALTHCARE OPERATIONS EXPERIENCE

Trainee Medical Technologist

Quest Diagnostics | Chantilly, VA | Aug 2021 – Apr 2022

- Processed high-volume clinical samples in a quality-controlled laboratory environment.
- Monitored assay performance using control metrics and documented results in laboratory information systems.
- Collaborated with team members to resolve workflow discrepancies while maintaining QA/QC standards.

Certified Pharmacy Technician

Costco Wholesale | Leesburg, VA | May 2018 – Aug 2021

- Processed high-volume prescription claims and ensured compliance with HIPAA and payer billing requirements.
- Coordinated with insurers and providers to resolve reimbursement and medication access issues.
- Reviewed patient, prescription, and insurance information for accuracy, completeness, and workflow efficiency.

LEADERSHIP & AFFILIATIONS

Vice President of Philanthropy, Society for Women and Leadership, UTHealth | 2024 – 2025

American College of Epidemiology; Virginia Public Health Association | 2024 – Present

CERTIFICATIONS

GET PHIT Professional Development Certificates: Public Health Informatics, Health Data Science, Health Equity, Public Health Analytics

CITI Program: Social & Behavioral Research – Group 2; Data Acquisition & Management
